

MEDICAL

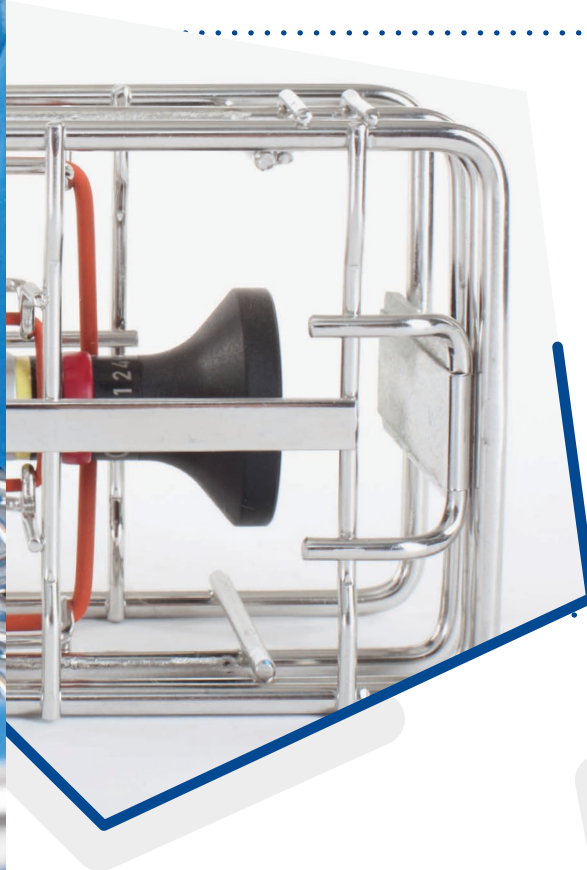

RECONDITIONING OF INSTRUMENTS

Baskets and trays made of stainless steel for precision cleaning and sterilization with custom and sequential positioning of the instruments. Modular system of holders (silicone profiles or PPSU) to optimize the internal layout of the basket.

RECONDITIONING ENDOSCOPES

Trays and wire formed structures to optimize reconditioning processes. Minimal surface of contact between instrument and holder (thanks to silicone profile or bands FDA approved) with absolute protection for the optics/piece.

WASHING SYSTEMS

Complete racks with several sprinklers, developed in close cooperation with our partners/manufacturers of cleaning devices.

IMPLANTS AND SCREWS

Baskets and inserts for degreasing and precision cleaning during production process of implants and instruments in different sizes and shapes. Custom development to optimize washing processes and positioning of the items.

BASKETS
FOR THE MEDICAL SECTOR

MORE EFFICIENT WASHING PROCESSES AND STERILIZATION WITH OUR FAST SYSTEM AND OUR CUSTOM SYSTEMS

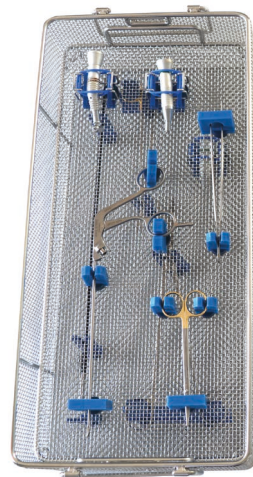

FAST SYSTEM

- Standard sizes with bottom and sides in different materials such as woven mesh or micro-perforated sheets
- Positioning of the instruments with holders in silicone or PPSU FDA approved
- Easy to handle and user friendly, no tools needed
- Custom shaped holders and profiles

PRECISION CLEANING AND STERILIZATION

- Maximum washing and degreasing surface (large good empty/full ratio)
- Minimized surface of contact from holder to instruments/implants, no shadows
- Great dripping characteristics
- No fluid retention
- Targeted/precise positioning of washing on the component
- Resistance to acids thanks to different coatings (Epoxy, Rilsan, Halar, Teflon, Talisman, ...)

ERGONOMICS END RESISTANCE

- Interesting ratio weight/dimension thanks to wire and mesh baskets
- Great mechanical resistance in comparison with basket weight
- Excellent impact and stress resistance
- Modular systems for baskets, inserts and lids
- Accurate finishing for a hand-friendly use of the basket
- Perfect stackability

CUSTOMIZATION

- Basket development and production according to customer's needs
- Development of multifunctional solutions suitable for reconditioning and production processes
- Wire from 1 to 12mm in diameter
- Combination of wire with meshes, sheets, silicones and PPSU FDA approved
- Silicone and PPSU profiles
- Wide choice of colours and coatings also FDA approved (Epoxy, Rilsan, Halar, Teflon, Talisman, ...)
- Engraving and screen-printing of logos, codes and layouts
